Summary

Application Developer with hands-on experience across the full software development lifecycle (SDLC) – designing, developing, debugging, and unit testing application components, and maintaining relational database–backed enterprise systems. Comfortable with object-oriented programming, Agile/Scrum practices, version control, secure coding, and cross-functional collaboration with distributed teams. Strong troubleshooting and root-cause analysis skills gained from resolving production issues; quick to acquire new enterprise platforms and languages.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL
CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Management Systems (RDBMS)
Databases: PostgreSQL, RDBMS design & integration, NeonDB, Supabase
Development Practices: SDLC, Agile/Scrum, Unit Testing, Debugging & Troubleshooting, Root-Cause Analysis, Code Reviews, Secure Coding, Technical Documentation, Defect Resolution
Version Control & DevOps: Git, GitHub, GitHub Actions, CI/CD, Docker, Linux, Nginx, VPS Deployment
Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Web Services, API Integration
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Tools: Postman, VS Code, Microsoft Visual Studio, Technical Problem-Solving
Professional Skills: Communication, Cross-Functional Collaboration, Adaptability, Continuous Learning, Analytical Thinking

Education

Dr. D.Y. Patil School of Science and Technology — Pune, Maharashtra
Bachelor of Technology in Artificial Intelligence and Data Science; CGPA: 9.00/10 — *Aug. 2022 – Aug. 2026*

Experience

Full-Stack Developer Intern — Oct. 2025 – Jul. 2026
Shivohini TechAI LLP — *Udaipur, Rajasthan*

- Participated across the full SDLC to design, develop, debug, and unit test 10+ enterprise application modules – Employee Management, Client CRM, Invoicing, and Task Management – following coding standards and software engineering best practices.
- Built and integrated 40+ REST API endpoints for authentication, automated workflows, and document management, applying secure coding practices (JWT-based authentication) to production business applications.
- Streamlined deployment and version-control workflows across 4+ applications using Docker, Nginx, Linux, Git, GitHub Actions, and CI/CD, improving deployment efficiency by 90%.
- Collaborated with senior engineers and product teams to troubleshoot, debug, and resolve production incidents on live enterprise applications – performing root-cause analysis that reduced system errors by 85% and accelerated feature release cycles by 5 days.
- Maintained technical documentation for assigned development tasks and participated in code reviews and knowledge-sharing sessions with cross-functional, globally distributed teams.

Projects

ResumeForge-AI | *React.js, Node.js, Express.js, Gemini AI, n8n, PostgreSQL*

- Designed and developed an AI-powered full-stack platform automating generation and validation of 20+ tailored, job-specific resumes, applying an end-to-end SDLC approach from design through testing and deployment.
- Built an end-to-end job-description analysis and content-optimization pipeline, applying structured problem-solving to reduce resume preparation time by 60%.
- Integrated resume generation, AI processing, and application tracking through REST APIs and n8n workflows, with PostgreSQL (NeonDB) providing persistent relational database storage.

Employees-Desk | *React.js, Node.js, Express.js, PostgreSQL*

- Built a scalable enterprise full-stack platform with secure authentication and Role-Based Access Control (RBAC) across 4 user roles, developing and unit testing both UI and backend components.

- Designed a modular REST API architecture across 6 core business modules (CRM, project management, task management, invoicing, notifications, document generation), applying OOP and RDBMS design principles.
- Implemented JWT authentication, automated alerts, file management, CRUD operations, and dynamic PDF generation with structured relational database models for secure, persistent data management.

Certifications & Achievements

- **Smart India Hackathon**: Internal Round Winner and Top 5 Team (National-Level Competition) – led a 5-member team from ideation through prototype delivery and presentation.
- **HackerRank**: SQL (Basic) – Top 10% Global Percentile.
- **TCS iON**: Career Edge – Young Professional.
